

HOW TO LEAD A LINE SWEEP

submitted by D.A.

Playa Restoration Manager,
Black Rock City Department of Public Works

M.O.O.P. (n) - Matter Out Of Place: especially as it applies to Black Rock City and its Citizens. MOOP can be anything that does not belong on the Playa: cigarette butts, bottle caps, glowsticks, fireworks, but is often disguised as debris: i.e., broken bits of wood, plastic, metal, glass, and plants. MOOP can also be a condition: burn scars, dunes, grey water, paint, etc.

MOOP (v) - to pick up Matter Out Of Place

MOOPER (n) - one who moops

LINE SWEEP (n) a forward moving line up of moopers side by side and arms width apart; a quick and efficient community effort for scanning and picking up Matter Out Of Place over a given area of playa surface such as your camp, city block, art installation, village, etc.

THE RULE OF THUMB FOR LINE SWEEPS:

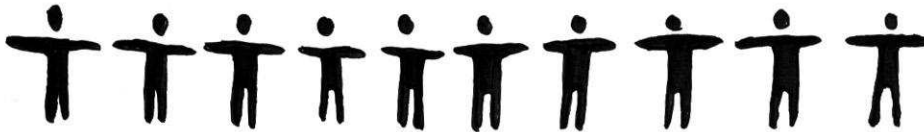

Width of Camp \div **Arms Width Apart (approx. 6ft.)** = **OPTIMAL NUMBER OF MOOPERS**

Ex. A camp that is 60 ft. wide should have at least 10 Moopers on The Line

Step 1: LINE UP!

Step 2: SPREAD OUT!

Step 3: MOOP OUT!
